

a. Mean Correlation with FC of FCs with Temporal Averaging over High Amplitude Nodes / Frames

b. Mean Difference of Various Notions of Functional Connectivity between WM and Rest

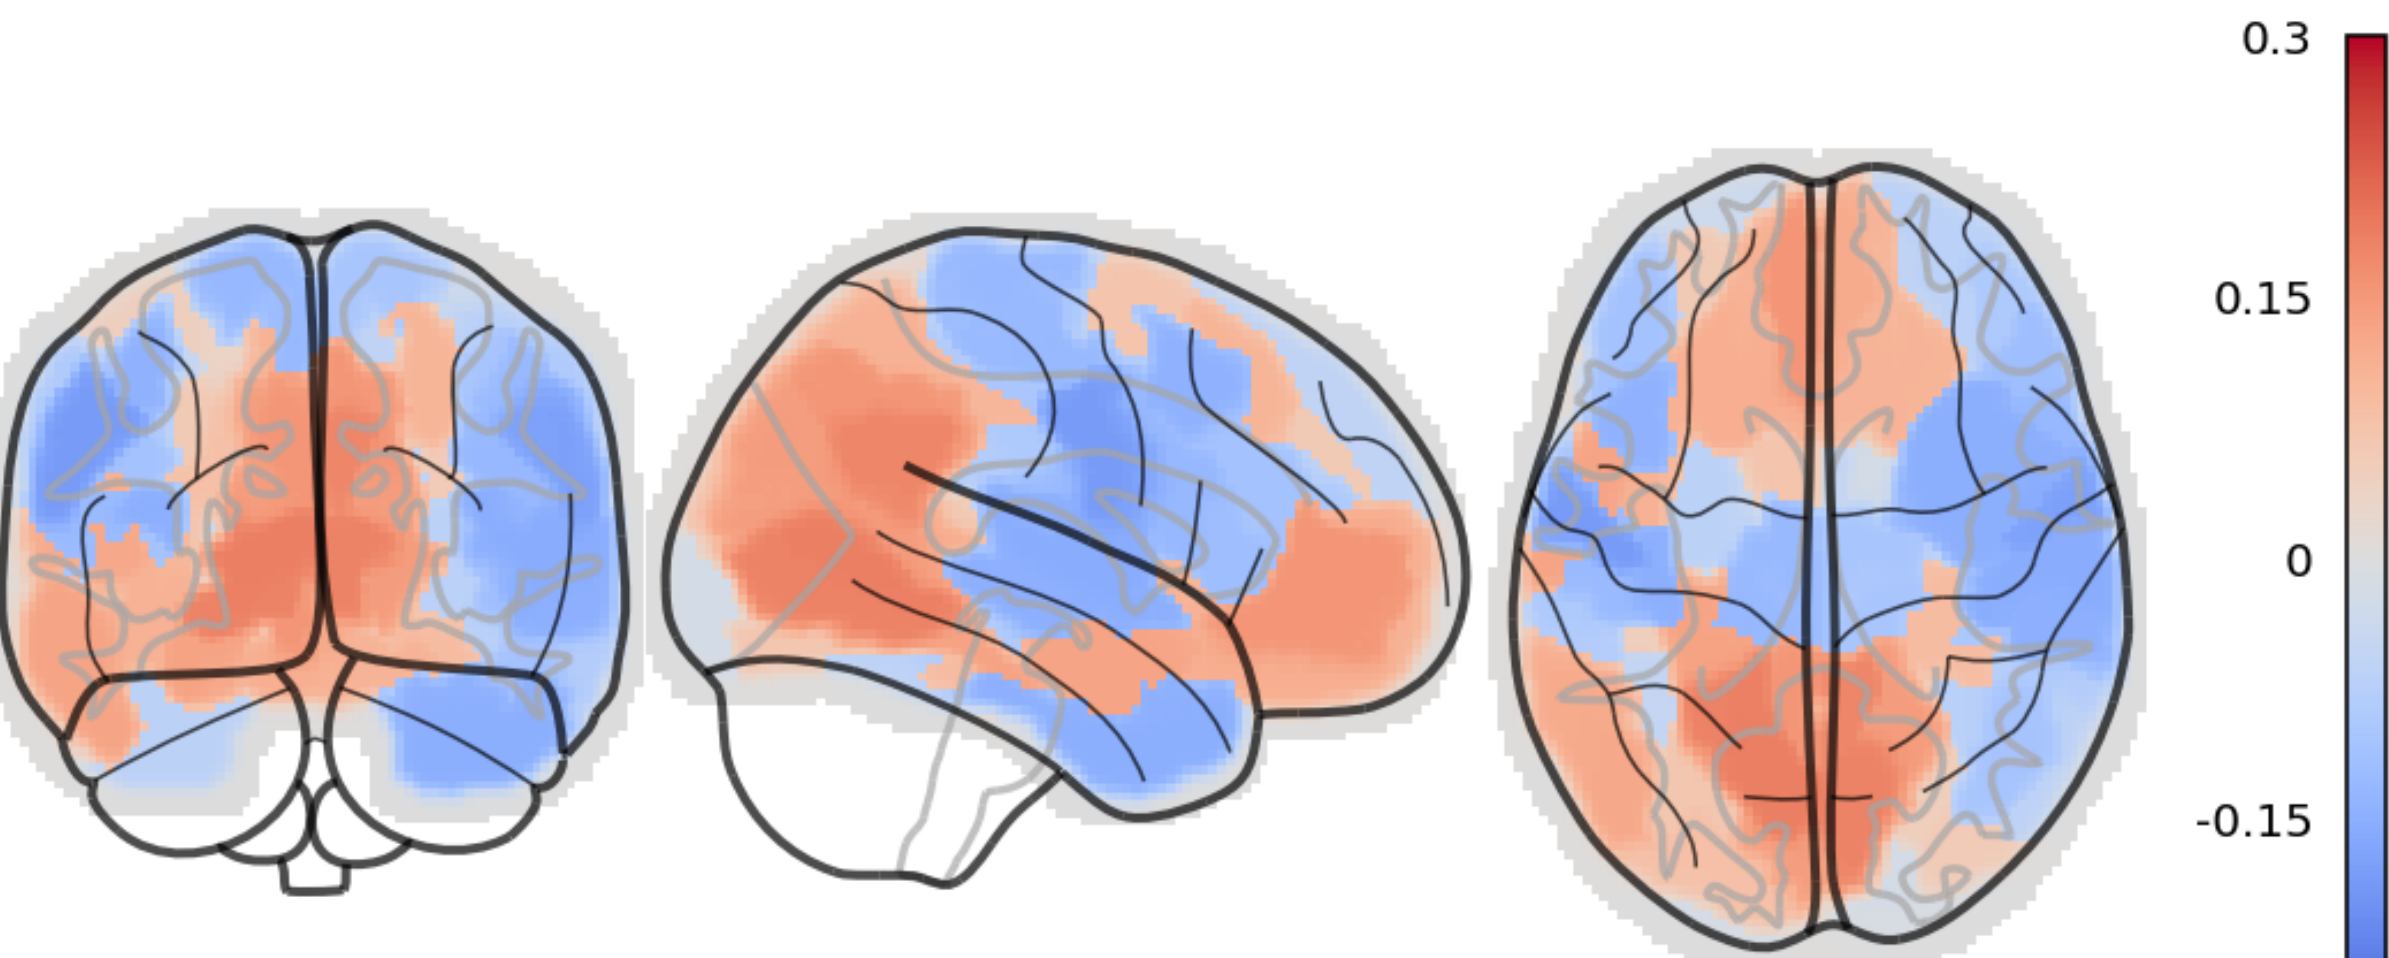

c. Mean Task Frame-Level Peak-Dense-Pure-Node Functional Connectivity and Associated Eigenvectors

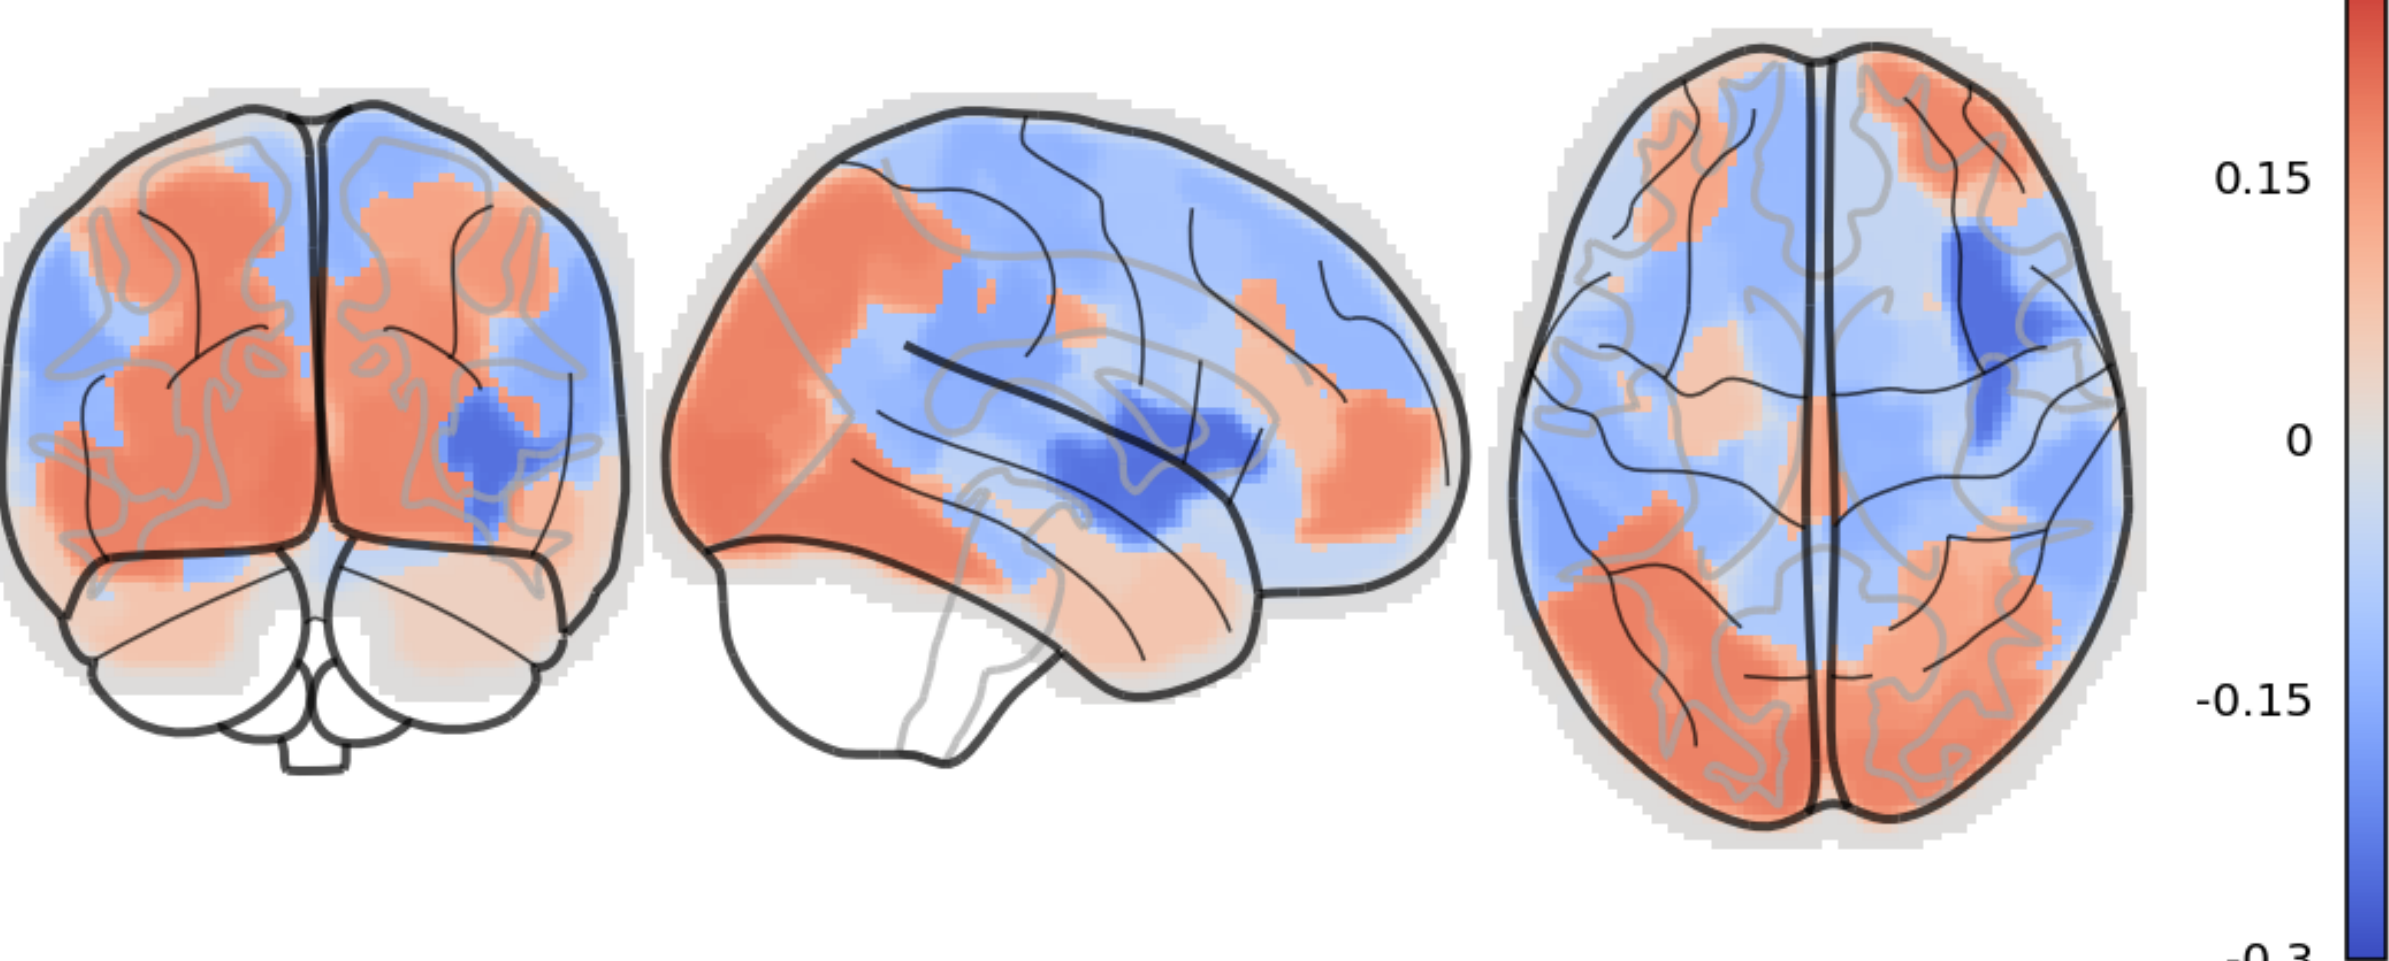

Peak-dense-pure-node functional connectivity

Explained variances

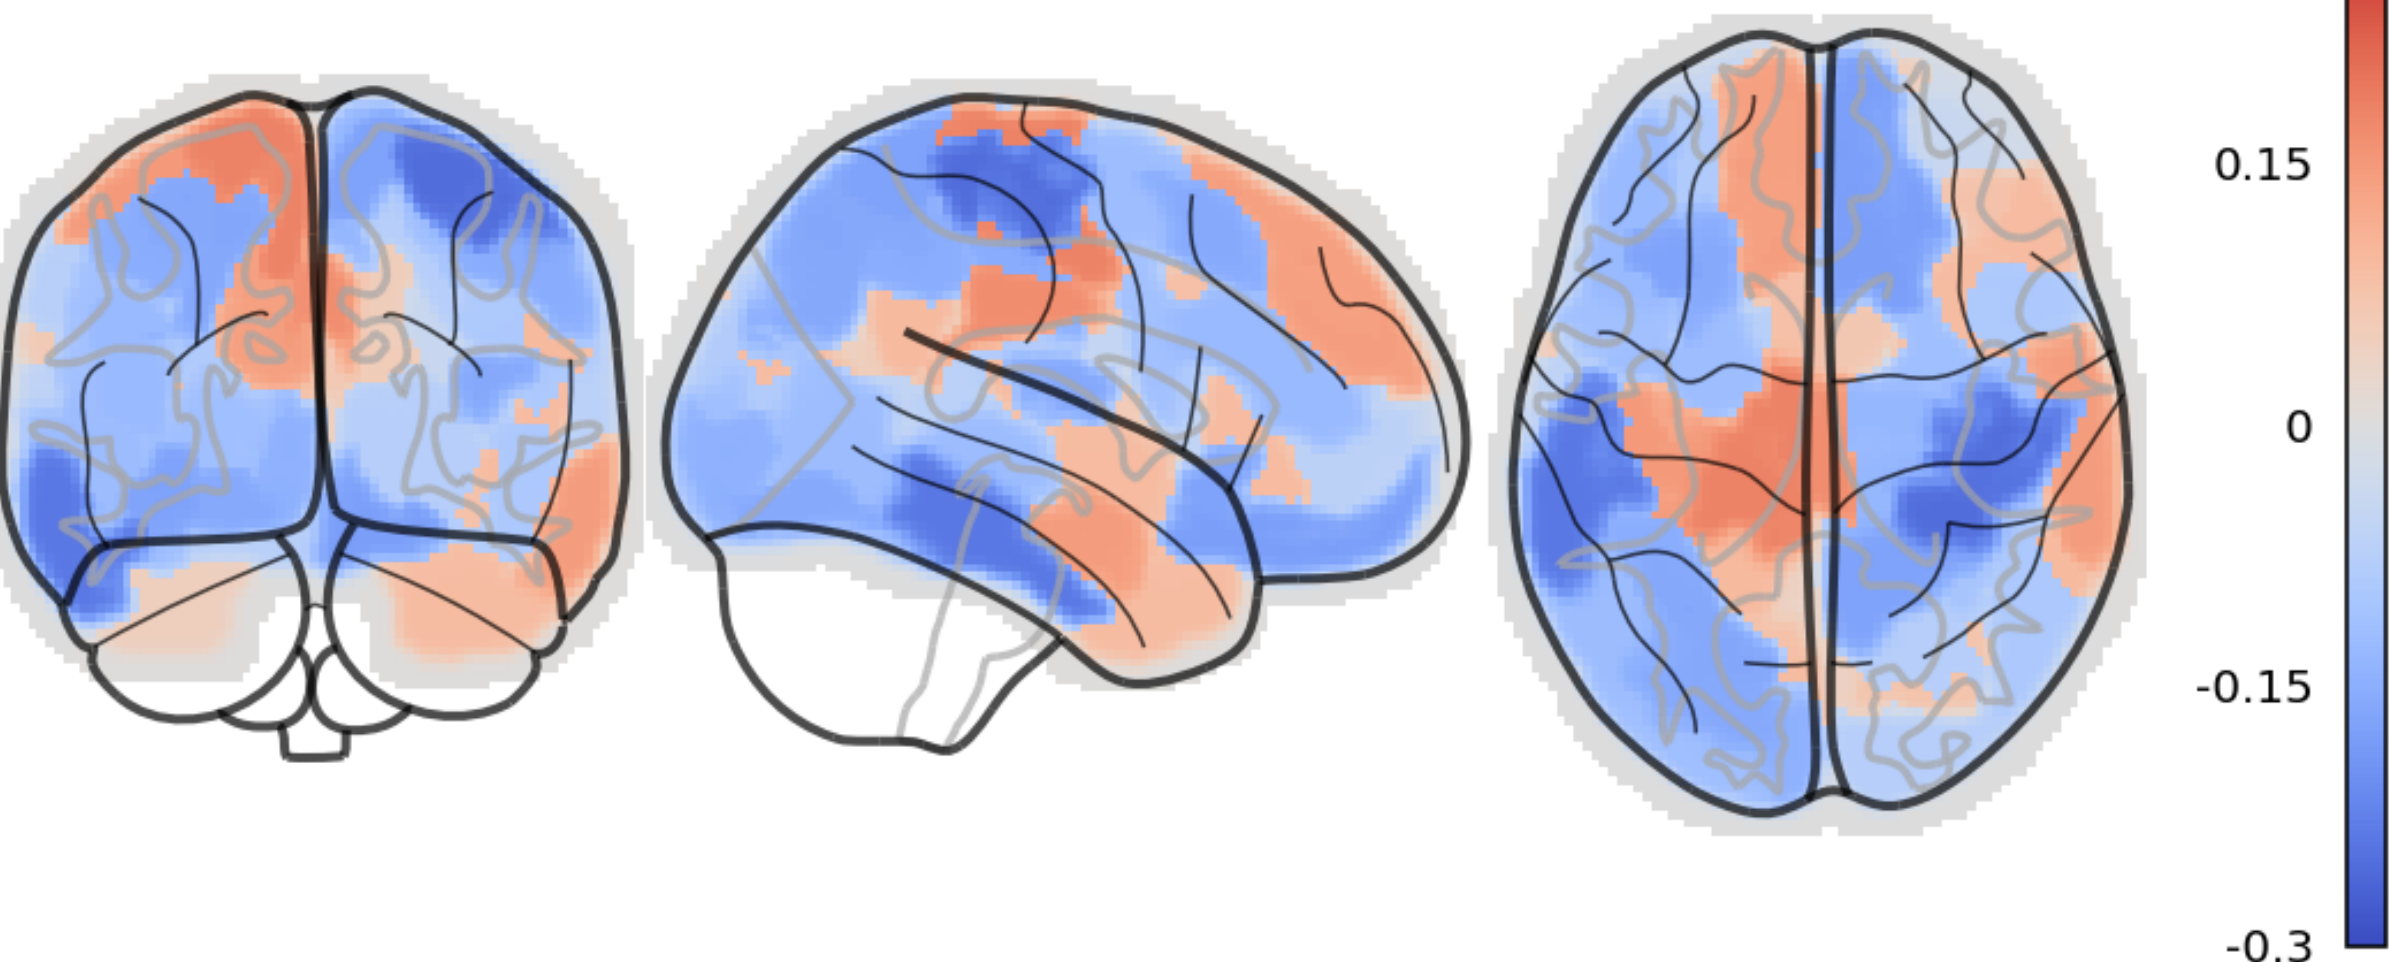

First eigenvector 22.2%

Second eigenvector 10.6%

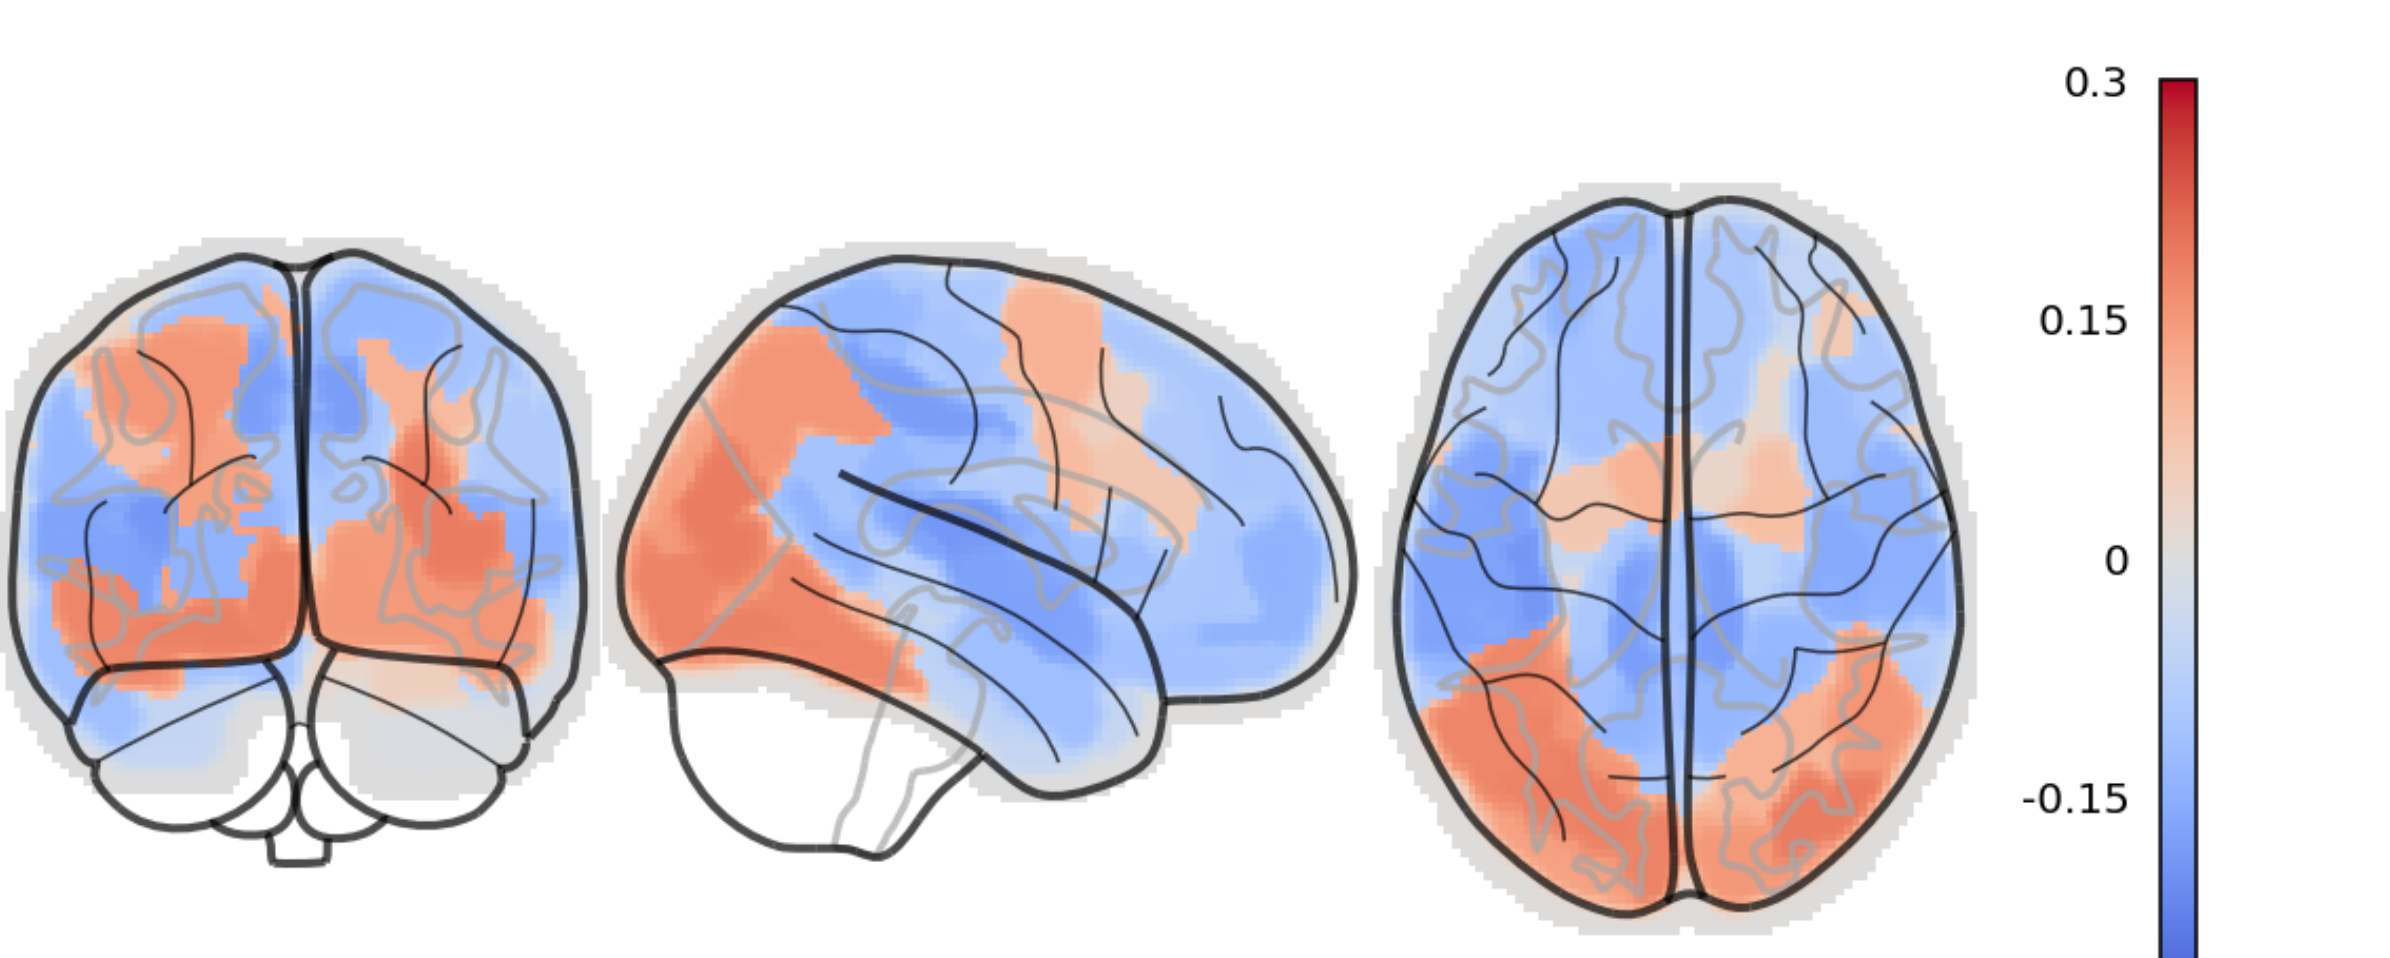

Third eigenvector 5.92%

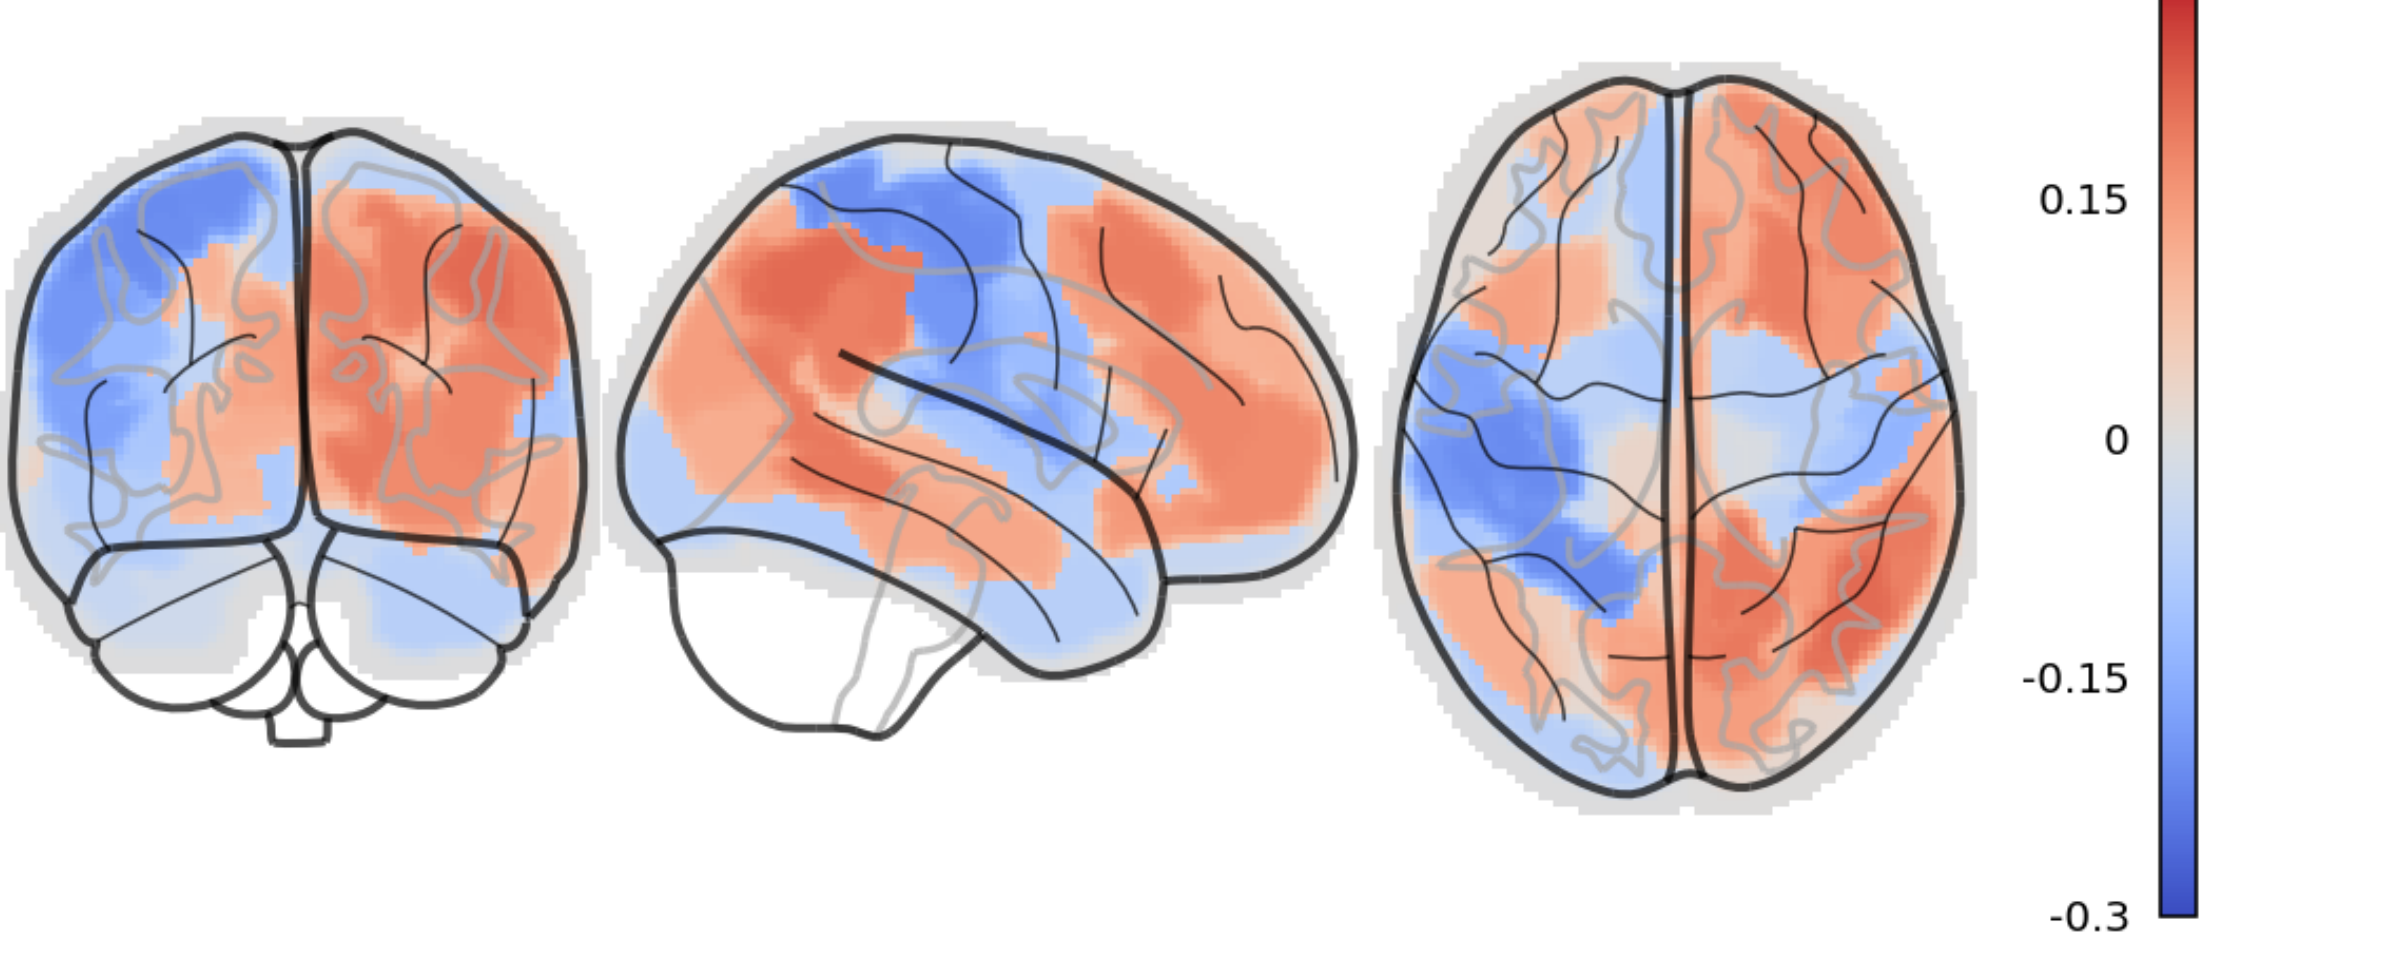

Explained variances

15.6%

8.82%

5.12%
